## Calculating Average Speed

Graph the following data and answer the questions below.

Time (min.)	Distance (m)
0	0
1	50
2	75
3	90
4	110
5	125

$$\text{average speed} = \frac{\text{total distance}}{\text{total time}}$$

1. What is the **average speed** after two minutes? \_\_\_\_\_
2. What is the **average speed** after three minutes? \_\_\_\_\_
3. What is the **average speed** after five minutes? \_\_\_\_\_
4. What is the **average speed** between two and four minutes? \_\_\_\_\_
5. What is the **average speed** between four and five minutes? \_\_\_\_\_
